PROFESSIONAL SUMMARY

- M.Sc. Accounting & Business Intelligence graduate from Brunel University London with Distinction and B.Com (Hons.) in Accounting & Finance with First Class with Distinction.
- Data Analyst Intern with hands-on experience in financial and operational analysis, data quality, KPI reporting, MIS automation and dashboarding.
- Analysed 900,000+ records using SQL, Python and Excel; built Power BI reporting and automated recurring MIS workflows with Power Query, PivotTables and XLOOKUP.
- Strong foundation in financial analysis, commercial analytics, variance/KPI reporting and business decision support.

SKILLS

Finance & FP&A: Financial Analysis, Management Reporting, KPI Analysis, Variance Analysis, Revenue Analysis, AOV, CLV, GMV, Commercial Analysis

Data & BI: SQL, Python, Power BI, Tableau, Data Cleaning, Data Validation, Data Quality, Data Visualisation

Excel & Reporting: Advanced Excel, Power Query, PivotTables, XLOOKUP, SUMIFS, COUNTIFS, MIS Reporting, Reporting Automation

Business: Business Analysis, Process Improvement, Market Research, Competitor Analysis, Stakeholder Communication, Strategic Analysis

PROFESSIONAL EXPERIENCE

Data Analyst Intern | Internmo, Gurugram, India | *Jul 2026 – Present*

- Audited, cleaned and validated 900,000+ operational and user-activity records across six relational tables using SQL, Python and Excel.
- Performed data-quality checks for duplicates, missing values, primary-key/foreign-key mismatches and field-level issues to support reliable reporting.
- Built Power BI dashboards and KPI reports covering operational performance, user engagement and business trends for management review.
- Automated weekly MIS reporting using Excel Power Query, PivotTables and XLOOKUP, improving reporting consistency and reducing repetitive manual effort.
- Prepared analytical findings and communicated data issues and business observations to stakeholders.

Founder & Product Lead | Comfy, India | *Jan 2026 – Aug 2026*

- Developed a D2C furniture business concept covering commercial planning, customer analytics, pricing and digital product discovery.
- Applied AOV, CAC, CLV, conversion and delivery-planning considerations to support commercial and product decisions.
- Developed a technology-enabled product concept using 3D WebAR visualisation and visual recommendation features.

Postgraduate Student Representative | Brunel University London, UK | *Feb 2025 – Apr 2026*

- Collected and structured feedback from 100+ postgraduate students, prepared quantitative summaries and presented improvement recommendations to course leadership.
- Maintained meeting documentation and coordinated information with academic stakeholders.

Campus Brand Ambassador | Higherin, London, UK | *Jan 2026 – Jun 2026*

Tracked campaign views, registrations, links and click-through rates and used campaign data to support performance analysis and reporting.

PROJECTS

IndiaKart — E-Commerce Financial & Operational Analytics | *SQL, Python, Advanced Excel, Power BI*

- Analysed 216,200 records across eight relational datasets covering 24 months of orders, customers, payments, returns and inventory.
- Calculated GMV of ₹314.7 Cr, delivered net revenue of ₹205.4 Cr and AOV of ₹63,198; identified a 1.47x CLV advantage for Premium customers.
- Identified 30.8% return rate, 12.0% cancellation rate, 3.5% payment failure rate and 92.2% inventory fill rate, translating findings into management actions.

StreamFlix — Customer, Content & Revenue Analytics | SQL, Python, Excel, Power BI

- Analysed ~979,000 platform records across six relational tables covering subscribers, content, viewing, ratings, reviews and watchlists.
- Calculated platform KPIs including 3.33M watch hours, 74.7% active rate, 25.3% churn rate, 65.3% completion rate, \$175.9K MRR and \$15.70 ARPU.
- Identified churn concentration, content-spend efficiency and subscriber engagement patterns and translated findings into retention and content-investment recommendations.

Bili Hu Coffees — Business Intelligence System Design | Power BI, Python, Predictive Analytics, BI Architecture

- Designed an end-to-end BI solution addressing fragmented Shopify, Excel, Tally ERP and IoT data through proposed ETL, data-warehouse and dashboard architecture.
- Developed a dashboard prototype covering SARIMA demand forecasting, RFM segmentation, SKU performance, churn-risk analysis, roast-quality monitoring and market-basket opportunities.
- Defined KPI targets for forecasting accuracy, stock performance, customer lifetime value, acquisition efficiency, retention and reporting productivity.

Ceres Power — Commercial Readiness & Digital Transformation Analysis | Business Intelligence, Strategic Analysis, Competitor Benchmarking

- Conducted consultancy analysis covering competitor benchmarking, strategic positioning, commercial readiness, BI capabilities, partner governance and KPI requirements.
- Translated research findings into practical recommendations for technology, performance measurement and commercial decision support.
